

## MAGNAWAX (WHITE) - TECHNICAL DATA

Description:	Magnawax - White consists of a homogeneous blend of Montan and Petroleum waxes. It is silicone free.
Colour:	White.
Solvent:	Mixed Hydrocarbon.
Consistency:	Soft Paste.
Flammability:	Flash Point 40.5°C.
Solids Content:	32% ± 2%.
Solubility:	Completely insoluble in water.
Storage:	Store in a cool, dry place away from flames, sources of heat and sunlight. Containers should be kept closed at all times when product not in use.
Shelf Life:	Magnawax - White should be stored at 10°C ± 2°C in closed containers to maximise shelf life.
UN No:	1993
Class	3 ADR Item 30

### Its use and application:-

Its soft paste consistency makes it ideal for use as a Flange and Shower Tray Top Hat Wax. It can be applied with either a soft brush or a cloth. When used as a flange wax it would not normally be polished, once applied, and can give multiple releases. There is no further waiting time required for it to cure and it can be put in to production straight away.
